Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claim 19 is withdrawn in view of the newly discovered reference(s) to Ishinaga (6608334). Rejections based on the newly cited reference(s) follow.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Recited "and wiring conductor" in lines 13 and 15 is indefinite because it does not refer to either the first wiring conductor or second conductor. The claimed is being interpreted as "and second wiring conductor" for the purpose of examination.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2814

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claim 19 is rejected under 35 U.S.C. 102(e) as being anticipated by US 6608334 to Ishinaga.

Regarding claim 19, Ishinaga discloses in fig. 1 a semiconductor light emitting device comprising a support plate 14, col. 2 line 59; a light-reflective reflector 20, col. 3 line 6, having a reflector block 20, col. 3 lines 30-32, which is mounted on the support plate 14, or integrally formed with the support plate, the reflector being formed with a hole 22e, col. 3 line 29, upwardly expanding; a semiconductor light emitting element 12, col. 2 line 57, mounted on the support plate within the hole of the reflector; a first wiring conductor 16a, col. 2 line 65, electrically connected to one electrode of the light emitting element; a second wiring conductor 16b, col. 2 line 66, electrically connected to the other electrode of the light emitting element through a lead wire 18, col. 2 line 80; wherein the reflector has a notch 24a, col. 3 line 14, which passes through the reflector block 20 between the hole 22e and an outer side wall 22a, col. 3 line 14, and between the light emitting element 12 and second wiring conductor 16b; the lead wire 18 passes through the notch 24a to electrically connect the light emitting element and the second wiring conductor 16b, fig. 1 and 2.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thao X. Le whose telephone number is (571) 272-1708. The examiner can normally be reached on M-F from 8:00 AM - 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael M. Fahmy can be reached on (571) 272 -1705. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
